WITH COURSES OF INSTRUCTION.

1897-98.

PULASKI, VA.:
B. D. SMITH & BROTHERS, PRINTERS.
1898.

CALENDAR, 1898='99.

1898.

JUNE 4.—Annual meeting of the Board of Trustees.

JUNE 4, 8:00 P. M.—Contest for the Williams Medal for Declamation.

JUNE 5, 11:00 A. M.—Baccalaureate Sermon, by Rev. A. Coke Smith, D. D., Lynchburg, Va

JUNE 5, 8:00 P. M.—Sermon before the Y. M. C. A., by Rev. Nathan Bachman, Sweetwater, Tenn.

JUNE 6, 10:00 A. M.—Contest for Robertson Prize Medal for Oratory.

JUNE 6, 11:00 A. M.—Annual Address before the Alumni Association, by Rev. W. S. Neighbors, Knoxville, Tenn.

JUNE 6, 8:00 P. M.—Anniversary Celebration of the Calliopean Literary Society.

JUNE 7, 10:00 A. M.—Commencement Day. Addresses by the Graduating Class; Conferring of Degrees and Award of Medals.

JUNE 7, 11:00 A. M.—Annual Address before the Calliopean and Hermesian Societies, by Hon. A. A. Taylor, of Tennessee.

JUNE 7, 4:00 P. M.—Anniversary Celebration of the Hermesian Literary Society.

SEPTEMBER 14 (Wednesday), 9:00 A. M.—Beginning of the Next Session.

LAST SATURDAY IN OCTOBER.—Field Day for Athletic Sports.

NOVEMBER 25, 7:30 P. M.—Public Debate of the Calliopean Literary Society.

1899.

FEBRUARY 1.—Beginning of the Spring Term.

APRIL 14, 7:30 P. M.—Public Debate of the Hermesian Literary Society.

LAST FRIDAY IN MAY.—Field Day for Athletic Sports.

JUNE 11 to 13.—Commencement.

FACULTY.

REV. R. G. WATERHOUSE, M.A., D.D., President.
(*Emory and Henry College.*)

Professor of Psychology and Ethics.

REV. EDMUND LONGLEY, M.A.,
(*Wesleyan University.*)

Professor Emeritus of Modern Languages.

REV. JAMES A. DAVIS, M.A.,
(*Emory and Henry College.*)

Professor Emeritus of Natural Sciences.

JOSEPH L. JARMAN, B.A.,
(*Graduate of University of Virginia.*)

Professor of Natural Sciences.

JESSE T. LITTLETON, M.A.,
(*Randolph-Macon College.*)

Professor of Modern Languages.

JAMES S. MILLER, C.E., D.Sc.,
(*University of Virginia ; Goettingen, Germany.*)

Professor of Pure and Applied Mathematics.

JAMES H. MOSS, M.A.,
(*University of Virginia.*)

Professor of Ancient Languages.

JAMES W. COLE, M.A.,
(*Emory and Henry College.*)

Inst. in Ancient Languages and English.

JOHN F. JOHNSTON, { Inst's in Gymnasium.
JAMES L. DAVIS, }

Preparatory Department.

J. W. COLE, Superintendent.
GEO. H. KENDRICK, . Assistant in Study Hall.

Officers of the Faculty.

RICHARD G. WATERHOUSE, Chairman.
J. H. MOSS, Secretary.
J. W. COLE, Librarian.

Freshman, 30	Total, 119

GENERAL STATEMENTS.

It is a well recognized fact that no fixed and rigid curriculum can be adapted to the varying requirements of different students and the College therefore offers a variety of courses leading to the degrees of B. A., B. S., and M. A.

These courses differ chiefly in the relative importance assigned to Classics on the one hand, and to Modern Languages and Scientific Studies on the other.

The average student will find it greatly advantageous to enter one of these regular courses and pursue the studies in their natural order.

Classes meet five times a week ; forty minutes is allowed to each recitation.

Requirements for Admission.

Students from other chartered institutions must bring a certificate of honorable dismissal.

Applicants for admission to any of the College classes are required to give satisfactory evidence, by examination or otherwise, of their fitness therefor, and candidates for admission to an advanced class in any course for graduation are required to make up any deficiencies in subjects which precede the point of entrance. The importance of thorough and uniform preparation in elementary studies is urged upon all.

The requirements for admission to the Freshman classes are briefly summarized by subjects as follows :

English.—A good knowledge of Grammar and of United States History.

Latin.—About three books of Cæsar or its equivalent, with exercises and Grammar such as may be gotten by the use of Collar and Daniel's Beginner's Latin.

Greek.—White's Beginner's Greek Book.

Mathematics.—The student should have had a thorough drill in the fundamental operations of Algebra, including some knowledge of the simpler forms of quadratic equations, and be well versed in the elements of Plane Geometry, including the original solution of exercises. Milne's, Venable's or Well's High School Algebra and the first three books of Wentworth's, Venable's, Well's or Macnie's Plane Geometry are recommended for this work.

Science.—Physical Geography.

COLLEGIATE COURSES.

For the degrees of Bachelor of Arts and Master of Arts the following groups of studies are recommended:

I.

Freshman Year.

Fall Term.

Latin.
Greek.
Algebra.
English.

Spring Term.

Latin.
Greek.
Geometry.
English.

Sophomore Year.

Latin.
Greek.
Trigonometry.
English.

Latin.
Greek.
Higher Algebra.
Geom. Analysis.
English.

Junior Year.

Latin.
Greek.
English.
Analytic Geometry.

Latin.
Greek.
English.
Ethics.

Senior Year.

Chemistry.
Natural Philosophy.
Logic and Psychology.

Chemistry.
Natural Philosophy.
Psychology.

*Additional requirements for M. A. on the above basis.

Senior Mathematics.
Senior English.
Latin.
Greek.

Senior Mathematics.
Senior English.
Latin.
Greek.

*In this course for Junior Latin or Junior Greek may be substituted either Senior Mathematics or Senior English.

II.

Freshman Year.*Fall Term.*

Latin or Greek.
 French or German.
 Algebra.
 English.

Spring Term.

Latin or Greek.
 French or German.
 Geometry.
 English.

Sophomore Year.

Latin or Greek.
 French or German.
 Trigonometry.
 English.

Latin or Greek.
 French or German.
 Higher Algebra.
 Geom. Analysis.
 English.

Junior Year.

Latin or Greek.
 English.
 Natural Philosophy.
 Analytic Geometry.

Latin or Greek.
 English.
 Natural Philosophy.
 Ethics.

Senior Year.

Chemistry.	Chemistry.
English or Mathematics.	English or Mathematics.
Logic and Psychology.	Psychology.

For M. A. on this basis.

Sen. Math. or Sen. Eng.	Sen. Math. or Sen. Eng.
French or German.	French or German.
Latin or Greek.	Latin or Greek.

III.

Freshman Year.*Fall Term.*

Latin or Greek.
 Algebra.
 Physiology.
 English.

Spring Term.

Latin or Greek.
 Geometry.
 Botany.
 English.

Sophomore Year.

Latin or Greek.
 Trigonometry.
 German or French.

Latin or Greek.
 Higher Algebra.
 Geom. Analysis.

English.

French or German.
English.**Junior Year.**

Analytical Geometry.

Astronomy.

German or French.

German or French.

English.

English.

Natural Philosophy.

Natural Philosophy.

Senior Year.

Chemistry.

Chemistry.

Geology.

Geology.

English or Mathematics.

Physics.
Logic, Psychology.
General Chemistry.

Astronomy.
Physics.
Psychology.
General Chemistry.

Senior Year.

Analytical Chemistry.
Mineralogy and Geology.
Analytical Geometry.
Calculus.

Analytical Chemistry.
Geology.
Calculus.
Ethics.

In addition to the above studies, regular exercises in Declamation are required of all students except the Junior and Senior Classes, and these are required to deliver original orations in the Chapel before the Faculty and students. These orations must be handed to the President for revision and correction during the months of November, February and March, and must be delivered at the times he appoints. Three are required of each Senior, and one of every Junior.

THE Departments and Methods.

PSYCHOLOGY AND ETHICS.

PRESIDENT WATERHOUSE.

The plan adopted in this department is a discreet combination of the recitation and the lecture. Pupils are required to make careful preparation upon the texts assigned for daily work. The subject matter of recitation is made the basis of the lecture, which contemplates the double purpose of inspiring original thought and of leading the pupil into the wider literature of the subject in hand.

TEXT BOOKS.—Moral Science, Valentine or McKenzie ; Mental Science; Elements of Psychology, by Noah K. Davis.

POLITICAL ECONOMY AND LOGIC.

These subjects are also assigned to the President, but in teaching them he receives valuable assistance from other members of the Faculty. It is hoped to make the study of these sciences a source of much pleasure and profit to the pupil.

TEXT BOOKS.—Political Economy, Walkers ; Deductive Logic, Noah K. Davis.

ENGLISH.

PROFESSOR LITTLETON AND MR. COLE.

Attention is invited to the four years' course of English offered below. While the course is

closely connected and progressive, each year's work is fairly complete in itself. Hence the demands of those young men who can go to college only one, two or three years are met.

Each class has in view both the linguistic and the literary departments into which the collegiate study of English naturally divides itself. Accordingly, while a knowledge of the grammar, the rhetoric and the development of the English tongue are being acquired, both by drill in text-books and by practice in composition, a personal acquaintance with some of the masters of English prose and verse is being made, not from text-books upon literature, not by cramming the opinions of others; but by reading at first hand the authors themselves. Thus, during the formative period of college life, it is hoped that the taste for what is true and beautiful, uplifting and strengthening, in the foremost language of the world, will be so formed and cultivated that it will, whatever be the course taken in after life, be productive of good.

Freshman Year.

The work of the Fall term is a review of English Grammar, an introduction to Rhetoric, a study of the literature-producing periods of English history, parallel reading and weekly exercises in composition and American literature.

With the substitution of Grammatical Analysis for Grammar, the work of the Fall term is continued through the Spring term.

TEXT BOOKS.—English Grammar by lecture; Rhetoric; Green's Readings from English History; Tom Brown's School Days; Pancoast's Introduc-

tion to American Literature ; Lamb's Tales from Shakespeare.

Sophomore Year.

Throughout the entire session the practical application of Rhetoric to literary work is carefully studied. During the Fall term the literature of England is studied in a condensed form, which gives place to a study of specimens of English and American literature in the Spring term. There are in connection with the Rhetoric, throughout the session, fortnightly compositions upon assigned subjects.

TEXT BOOKS.—Rhetoric ; Pancoast's Introduction to English Literature ; Tom Brown at Oxford ; The Vicar of Wakefield ; Irving's Sketch Book ; Selections from Hawthorne, Longfellow and Bryant.

Junior Year.

The Fall term is devoted to the study of Anglo-Saxon, the origin and development of modern English, and to a critical study of the prose of Webster, Burke and Bacon. Parallel reading is assigned from Dickens and George Elliot.

The study of Anglo-Saxon continues through the Spring term. The drama and poetry form the subject of the literature studies of this term. The following are read, some in class and some as parallel: The Merchant of Venice, Julius Cæsar, The Tempest, Elaine, Locksley Hall, Locksley Hall Sixty Years After, the Princess, Milton's Paradise Lost, I. and II. Monthly essays during the whole session. These count as one-third of the year's work.

TEXT BOOKS.—Smith's Old English Grammar ;

Shakespeare ; Tennyson ; Dickens ; George Elliot ; Bacon's Essays ; Burke's Orations ; Webster's Orations ; Milton.

Senior Year.

Fall Term.—Philology and the history and growth of language are studied by suitable textbooks, and by practice in Old English.

TEXT BOOKS.—Kent's *Elene* ; Peile's *Philology* ; Johnson's *English Words* ; Whitney's *Language and the Study of Language* ; Chaucer or *Piers Plowman*.

Spring Term.—DeQuincey, Ruskin, Shakespeare, Tennyson and Browning are studied partly with and partly without the teacher's aid.

Essays.—Four essays are required during the year. Subjects for session 1898-99: *The Tempest* ; *The Function of Literature in the College Course* ; *Chaucer's Prologue* ; *Tennyson's Princess*. For either of the above, an original poem or story may be substituted.

ANCIENT LANGUAGES.

PROFESSOR MOSS AND MR. COLE.

I.—LATIN.

For entrance into College Latin a reading knowledge is required of three books of *Cæsar* or its equivalent, familiarity with Latin forms, and drill in elementary syntax and prose composition.

Emphasis is placed upon the thorough and systematic study of Grammar, which is pursued daily in connection with translation until the Junior Year. In that year the student is expected, with the assistance of lectures, to take a comprehensive survey of the whole subject of Latin syntax. Due attention is paid to prosody, and a

reasonable amount of parallel reading is assigned to each class.

Freshman Year.—Cicero and Virgil are read, a careful study of the entire Grammar is made, with weekly exercises in prose composition.

TEXT BOOKS.—Bennett's Latin Grammar; Bennett's Latin Composition or Riggs' "In Latinum"; Cicero's Orations (Kelsey); Virgil's *Æneid* (Greenough and Kittredge).

Sophomore Year.—In this class special attention is paid to the development of Latin prose. Cicero, Livy and Tacitus are read. Roman history is begun.

TEXT BOOKS.—Bennett's Latin Grammar, Miller's Latin Composition, Cicero, *De Senectute* or *De Amicitia* (Shuckburgh); Livy (Greenough or Westcott); Tacitus, *Germania* and *Agricola* (Hopkins); Myer's Latin History.

Junior Year.—This year is devoted chiefly to the study of Latin poetry. History and Literature are studied in connection with class work.

TEXT BOOKS.—Gildersleeve's Latin Grammar (3rd Edition) or Allen and Greenough's Latin Grammar; Miller's Latin Composition; Horace (Smith and Greenough); Juvenal (Macleane); *Captives of Plautus* (Morris) or *Elmer's Phormio* of Terence; Myer's Latin History.

II.—GREEK.

Freshman Year.—For entrance into this class a thorough knowledge of the regular forms of Attic Greek is expected. The class reads Xenophon and Lysias. The forms are studied, and the leading principles of Greek syntax.

TEXT BOOKS.—Goodwin's Grammar; Xenophon's *Anabasis* (Goodwin & White); Pearson's

Greek Composition; Lysias (Bristol or Morgan).

Sophomore Year.—Attic oratory and philosophy form the basis of this year's work. The authors read are Lysias, Plato and Demosthenes. Greek History is begun.

TEXT BOOKS.—Lysias (Bristol or Morgan); Demosthenes, Phillippics (Tarbell); Plato, Apology and Crito (Dyer); Goodwin's Greek Grammar; Bridgman's Parallel Exercises (based on Lysias); Myer's Greek History.

Junior Year.—The class work of this year is spent in the study of Attic and Epic poetry. The work of the previous year is continued by parallel in the Attic orators, and by Greek composition based upon Lysias or Demosthenes. History and Literature are studied in class or as parallel.

TEXT BOOKS.—Sophocles, Antigone (D'Ooge) Euripides, Medea (Allen); Homer, Odyssey (Seymour & Perrin); Hadley and Allen's Greek Grammar; Myer's Greek History.

REQUIREMENTS FOR M. A.

In both Greek and Latin the work will depend largely on the tastes and purposes of the individual student. In any case, however, a large amount of reading will be required, with grammatical work enough to insure an appreciation of the peculiarities of the author, because it cannot safely be taken for granted, even at this stage of his advancement, that the student is ready to lay aside his grammar.

MODERN LANGUAGES.

PROFESSOR LITTLETON AND PROFESSOR LONGLEY.

FRENCH.

Junior—Muzzarelli's Academic French Course; Exercises; Super's Reader and Victor Hugo's La Chute.

Senior.—Sauveur's Grammaire Francaise pour les Anglais; Causeries avec mes Eleves; Moliere, Racine, Corneille. Weekly exercises.

A French literature is read as parallel.

In addition to the above the candidate for the M. A. degree will be examined upon assigned selections from any of the following authors: Corneille, Racine, Moliere, George Sand, Lamartine, Alfred de Musset, Victor Hugo, Daudet. Lectures upon the History of the Language.

GERMAN.

Sophomore Year.—Edgrena Fossler's Brief German Grammar.

As soon as possible in the Fall, some simple prose is read. These are followed by some selections from the many plays of the modern stage. In the Spring term there are weekly exercises from Harris' German Composition.

Junior Year.—Joynes-Meissner's Grammar completed.

Weekly exercises from Harris' German Composition continued. Selections from standard authors, from Lessing to the modern school, are carefully read. Conant's Primer of German Literature is read as parallel.

In addition to the above, the candidates for the M. A. degree will be examined upon the

private readings assigned them from one or more of such authors as are usually read at college.

TEXT BOOKS.—Joynes-Meissner's Grammar; Harris' German Composition; Selections from Modern Publications; Lessing; Schiller; Goethe; Conant's Primer of German Literature; Gore's German Science Reader.

MATHEMATICS.

PROFESSOR MILLER.

For admission to the College course, the student should have a thorough knowledge of Elementary Algebra, embracing the simpler forms of quadratic equations and of the elements of Plane Geometry, including some practice in the solution of exercises.

In all classes especial emphasis is laid upon the solution of problems and exercises, both as a means of impressing principles on the mind and as tending to promote the development of accurate and independent thought. Accuracy of knowledge is first sought, and after this as wide an acquaintance with different branches of the subject as the limit of time will allow.

The classes are grouped as follows :

Freshman Year.—Higher Algebra, embracing theory of Quadratic Equations, Imaginaries, Variation, Progressions, Binomial Expansion, Logarithms, Plane and Solid Geometry.

The classes in Geometry are so arranged that students who have not studied the subject can enter the sub-Freshman class in the Fall and continue the study uninterruptedly throughout the scholastic year.

TEXT BOOKS.—Philip's & Fisher's Geometry; Algebra, announced later.

Sophomore Year.—Plane and Spherical Trigonometry, including practice in the use of logarithmic tables, with numerous applications to measurements of heights and distances, and the simpler problems of astronomy and navigation.

Geometrical Analysis.—This course includes a brief review of the more important theorems and loci of Geometry, with applications of the same to numerous problems of geometrical construction, together with the development and use of some of the simpler theorems of Modern Geometry.

Higher Algebra, including Permutations, Combinations, Series, Theory of Notation and of Numbers, the elements of Determinants, and General Properties of Equations.

Plane Trigonometry and Geometrical Analysis are studied during the Fall term; Spherical Trigonometry and Algebra during the Spring term.

TEXT BOOKS.—Wells' Essentials of Trigonometry, Venable's Geometrical Exercises and Modern Geometry, Peck's Determinants; Algebra, announced later.

Junior Year.—Analytical Geometry of two dimensions; Astronomy, descriptive and mathematical. The course in Astronomy is designed to give an accurate and well-grounded conception of the fundamental facts, principles and methods of the science. For entrance to this class it is necessary that the student have a clear conception of the elements of Physics, and no one will be admitted who has not taken the course in General Physics, or its equivalent.

TEXT BOOKS.—Bailey & Wood's Analytical Geometry; Young's General Astronomy.

Senior Year.—Analytical Geometry of three dimensions, Differential and Integral Calculus, with numerous applications to problems of Physics and Mechanics, and selected chapters from the Theory of Equations. A brief course in History of Mathematics is read as parallel.

TEXT BOOKS. — Venable's Notes on Solid Geometry; Osborne's or Greenhill's Calculus; Ball's Shorter History of Mathematics; Notes.

Surveying.—Instruction in this subject, which includes Plane Surveying and Leveling, extends through the Spring term and is furnished by textbook, by lecture, and by associated field work. In the lecture-room the student is taught the general theory of Compass and Transit Surveying, and is well drilled in the solution of the fundamental problems arising in the practice of the same.

Especial prominence is given to the field work, and the student is made familiar with the use of the instruments in measuring and parting off areas, determining the length and azimuth of inaccessible lines, re-running old surveys, etc. For instruction in this subject the department is well equipped with fine instruments, including a vernier compass, a combined transit and level, with vertical arc and stadia wires, leveling rod, steel tapes, chains, etc.

The work is arranged to meet the wants of those students who desire a knowledge of the subject merely as a branch of scientific education, and also of those who desire to become practical surveyors. The latter will be required to pursue a more extended course in drafting and map-making,

and to this end will find it necessary to purchase drawing instruments and material costing from \$10.00 to \$15.00.

Students of the surveying class are charged \$1.00 for the use of instruments.

TEXT BOOKS.—Carhart's or Raymond's Surveying ; Notes.

Advanced Mathematics.—Special classes for pursuing advanced work in Pure and Mixed Mathematics will be formed as there is demand for such. The subjects studied will be chosen to meet the wishes and preparation of the students.

Advanced Physics (temporarily transferred to this department).—This course assumes a knowledge of the general principles of Physics, and proceeds to a more detailed study of certain subjects than is possible in a first year's course. A working knowledge of the simpler forms of the Differential and Integral Calculus will be found very helpful to the student. It is hoped that in the near future appropriate Laboratory work may be offered to students of this class.

NATURAL SCIENCES.

PROFESSOR JARMAN.

GENERAL PHYSICS.

This class meets five times a week throughout the entire session.

The instruction is given by recitations from text books, illustrated by suitable experiments.

In the Fall term the course consists of the discussion of the Laws of Motion, and Force and Energy as applied to Solids, Liquids and Gases. Problems are given from time to time illustrating

the practical application of the laws governing the science.

In the Spring term, Molecular Physics is discussed—Heat, Light, Sound, and Electricity. While due prominence is given to principles, frequent reference is made to the applications of the science.

It is hoped that during the next year this department will be so equipped that a Laboratory course may be given as supplementary to the work done in the class room.

TEXT BOOK.—Ame's Theory of Physics.

In addition to regular tuition fee, students pay one dollar per term for use of apparatus.

GENERAL CHEMISTRY.

This course consists of five lectures a week throughout the entire session, and collateral reading in the text, the lectures being fully illustrated by suitable experiments.

In the Fall term the subject of Inorganic Chemistry is taken up, embracing the study of chemical nomenclature, the writing of chemical formulæ, the laws regulating combination of substances both by weight and volume, the history and description of the elementary substances, both non-metallic and metallic, with their compounds, and the Atomic Theory as it is at present viewed.

Chemical problems are given throughout the course, illustrating the laws governing the science.

In the Spring term, Organic Chemistry is taken up and discussed in the order in which it is presented in Remsen's text book, which is used in connection with lectures and experimental illustrations. In this course the more common applica-

tions of Chemistry to the arts and manufactures are also alluded to. A short course in the history of Chemistry will be given.

The only way to learn Chemistry thoroughly is to study it in the laboratory, and in view of this fact a course in Experimental General Chemistry will be given.

By studying Chemistry in this way the class will gain an unusually good knowledge of the subject, as they will have an opportunity to make all of the experiments involved in the course.

All students in Chemistry are required to take this course, which continues through the Fall term, each student working not less than six hours a week.

The text books for the above course are as follows :

FALL TERM.—Remsen's Elementary Chemistry ; Venable's History of Chemistry.

SPRING TERM.—Remsen's Organic Chemistry.

ANALYTICAL CHEMISTRY.

The course consists of practical work done in the Laboratory, and extends through two years, the students being required to work at least ten hours a week throughout the course.

In the first year the subject of Inorganic Qualitative Analysis is treated fully, including Chemical Manipulation, Blow-pipe Analysis and Determination of Minerals, Qualitative Determinations being made of mixtures of Salts, Alloys, Minerals, etc.

In the second year the students are drilled in Quantitative Analysis, both gravimetric and volumetric. Complete Analyses of Ores, Minerals, Slags, Clays, Fertilizers, etc., are made ; also

considerable work in Assaying. Blow-pipe Analysis and Qualitative Analysis are continued through the second year.

Students applying for the B. S. degree are required to take only the first-year course, the second-year course being given to those who desire to continue their work in this line.

Text books for the above course are as follows:

FIRST YEAR.—Venable's Qualitative Analysis; Fresenius' Qualitative Analysis; Blow-pipe Analysis, by Erni; Fall's Laboratory Manual.

REFERENCE BOOKS.—Roscoe and Schorlemmer's Treatise on Chemistry; Remsen's Advanced Chemistry; Prescott and Johnson's Qualitative Analysis; Smith and Richter's Inorganic Chemistry; Shepard's Chemistry; Elliott and Storer's General Chemistry.

SECOND YEAR.—Thorpe's Quantitative Analysis; Fresenius' Quantitative Analysis; Ricketts' Fire Assaying.

The William Morrow Science Hall consists of two stories. The first floor, consisting of five rooms, is devoted to chemistry purposes. The laboratory is thoroughly equipped for instruction, being provided with every convenience for doing practical work, and exhibiting a complete series of experiments illustrating the lectures on General Chemistry. Contributions to the collection of minerals and ores will be thankfully received.

Arrangements made to analyze mineral waters, minerals, ores, furnace products, etc., at reasonable rates.

MINERALOGY.

This subject is studied in the Fall term, and is taught by recitation from the text books and by practical work done in the Laboratory. The

Theoretical course embraces a brief study of Crystallography. The students become familiar with the different forms by studying models which are furnished them, thus enabling them to recognize the simpler crystalline forms. The chemical and physical properties, mode of occurrence, etc., of the minerals are also made prominent. The Laboratory course embraces a study of Blow-pipe Analysis and Determinative Mineralogy. The Laboratory Class meets three times a week, from 2 to 4 P. M.

Text books for the above course are as follows:

Dana's Manual of Mineralogy; Foye's Hand Book of Mineralogy.

GEOLOGY.

Geology is studied in the Fall and Spring term.

Dynamical, Structural and Historical Geology are taught in the order in which they are discussed in the ordinary text books, the chief aim being to drill the student in the theory of science.

TEXT BOOKS.—William B. Scott's Introduction to Geology.

PHYSIOLOGY.

In this study the students acquire a knowledge of the properties and actions of the various organs of the human body in their normal condition, together with their functions. Anatomy is taught only so far as is essential to a clear understanding of the use and mode of working of each part of the body. This subject extends through the Fall term, and is illustrated with an excellent manikin.

TEXT BOOKS.—Walker's Anatomy, Physiology and Hygiene, and extensive Anatomical Charts.

BOTANY.

This subject is taught throughout the Spring term. The student is taught the form and structure of the plants, the functions of the different organs, the relationship of plants to each other, etc. The aim of the course is to train the student's observing faculties and give him an intelligent interest in plant life.

TEXT BOOKS—Bergen's Elements of Botany; Gray's Field and Forest Botany.

Charges per term for Laboratory courses :

	*Deposit for Apparatus.	Material.	Tuition.
Analytical Chemistry . .	\$5 00	\$10 00	\$10 00
Experimental Chemistry . .	5 00	10 00	
Determinative Mineralogy .	2 50	5 00	

Course of study in Natural Sciences :

Freshman Year—

FALL TERM.—Physiology and Zoology.

SPRING TERM.—Zoology and Botany.

Junior Year—

FALL TERM.—General Chemistry.

SPRING TERM.—General Chemistry, Geology.

Senior Year—

FALL TERM.—Analytical Chemistry, Mineralogy, General Physics.

SPRING TERM.—Analytical Chemistry, General Physics.

* Students are charged with only what apparatus they break ; the balance is refunded them.

PREPARATORY DEPARTMENT.

This Department the College has found essential to its work from the beginning, and it will doubtless continue to be for many years. To young men ready for collegiate work in all studies except Greek and Latin, it furnishes advantages far superior to those of the coaching system resorted to in some colleges.

To parents intending to send their boys from home because they have no good academy or high-school convenient, or because they need the stimulus of an educational atmosphere and new surroundings, this department also offers superior advantages. In fact, except where the best advantages are given, it is greatly to the interest of the student to spend his preparatory years with us, because in the absence of a careful drill in the elementary branches thorough mastery of a college course is impossible, and hence many a boy's taste for books is lost and his future as a scholar blighted.

Realizing the importance of this department, we are endeavoring to make it more efficient. We now have, as a part of its equipment, a Study Hall, furnished with tables and chairs, and provided with an instructor who hears no classes, but keeps order and gives the individual pupil aid in the mastery of his lessons. Every class is taught by an experienced teacher, and Prof. J. W. Cole, under the supervision of the Faculty, is charged with special responsibility for the order and progress of the department. Prof. Cole has his home

with those boys who room in the college buildings, and is thereby enabled the better to superintend all the interests of this department.

The course consists of two years, as given below:

Those entering the first year are expected to be proficient in Elementary English Grammar, Geography, and Arithmetic through Denominate Numbers, Common and Decimal Fractions. The following is the course for two years :

Preparatory Course.

For those whose advancement does not exceed the above requirements we form classes in beginning Latin, Elementary Algebra, Practical Arithmetic, English Grammar and State History.

TEXT BOOKS.—Collar and Daniel's Latin Grammar; Southworth and Goddard's Elements of Composition and Grammar; Cook's History of Virginia; Venable's Practical Arithmetic; Milne or Venable's High School Algebra.

Second or Sub-Freshman Year.

Fall Term.

Geometry.
Latin Grammar and Cæsar.
Maxwell's English Grammar.
Lee's U. S. History.
Greek Grammar.
Physical Geography.

Spring Term.

Algebra.
Latin Grammar and Cæsar.
Maxwell's English Grammar.
Lee's U. S. History.
Greek Xenophon.
Physiography.

TEXT BOOKS—Houston's Physical Geography; Thornton's Physiography; Phillips' and Fisher's Geometry; Venable's Practical Arithmetic and Easy Algebra; Milne's High School Algebra; Whitney's Essentials of English Grammar; History of the United States; White's Beginner's Greek Book.

Tuition charges in this department are : Preparatory year, \$15.00 ; Sub-Freshman, \$20.00. Board, washing, fuel, etc., are same as in Collegiate department, making the total, including board, \$156 and \$166 per year.

Physical Culture.

J. F. JOHNSTON, INSTRUCTOR.

"A sound mind in a sound body."

After virtue, there is nothing upon which the happiness and usefulness of men so much depend as upon the conditions of the body. While this fact is well known to all intelligent and experienced persons, it is a matter of which the young are hurtfully and almost universally ignorant. One of the first aims, therefore, of this department will be to impart to the pupil a proper conception of the value and sacredness of the body as the home, the working place and the instrument of the spirit.

All pupils entering the College are expected to take such work in this department as their needs may demand, unless excused by the physician or the Faculty.

When necessary, a physical examination will be given, and measurements and weights taken and recorded, so that the teacher may be prepared to modify the exercises to suit the special needs of pupils, and thereby build up the health and tone of each. All exercises will be under the supervision of the teacher, and individual instructions will be given when needed.

There will be four drills in the Gymnasium each week, the time for this work being from four to six o'clock in the afternoon.

There will be two field days for Athletic Sports during the season. The system of training used is, in the main, that of Prof. D. L. Dowd, as taught by him in his school of physical culture in New York city. The system is strictly one of light weight exercises, thus avoiding all danger of strain or rupture.

The following is an outline scheme of the work done :

1. Breathing exercises. 2. Daily work with light dumb-bells. 3. Club swinging. 4. Practice with fencing sticks. 5. Body movements without weights. 6. Walking and running exercises. 7. Work with wall machines.

Special attention is given to the work on the wall machines, as it is believed that a more systematic development can be obtained from this exercise than from any other work in the Gymnasium.

To this will be added instructions on the Campus in base-ball, tennis, and other approved games.

The place for the indoor work of this department is the

SAM SMALL GYMNASIUM.

The building has capacity for seating sixteen hundred people. It is octagonal in shape, has five large doors, twenty double hung windows, and gable and dome ventilation, so that the air within is as fresh as that without.

The place for out-of-doors work is the beautiful

COLLEGE CAMPUS,

which embraces twenty-two acres of shaded and

open lawn set in blue grass, and contains a bold and gushing spring of the best water known in this land of celebrated waters. The Campus, in addition to being a superb place for manly exercises, is a delight to the eye, and refining in its influence upon the mind.

There has always been a marked physical improvement among the students during each session in weight, strength, and increase of lung power, and in general freedom from sickness.

The fee in the department of Physical Culture is \$2.50 per term of five months, and must be paid unless a student is excused on physician's advice.

For the further promotion of Physical Culture, an Athletic Association has been organized, and under its auspices come the Field-Day contests referred to above. Suitable prizes for running, jumping, putting the shot, throwing the base ball, etc., are given to the successful contestants, and their record carefully preserved.

Examinations.

In addition to the examinations at the daily recitations, special examinations are conducted in writing at or near the end of each term. These special written examinations cover the subjects gone over during the whole term, and are made fair, yet searching, tests of the student's knowledge.

In the final valuation of grades, for all promotions, honors and diplomas, the class standing of students is taken into account, as kept from day to day by the different professors, and is valued at 25 per cent., while the written examinations at the end of each term is valued at 75 per cent., *i. e.*, ou

of possible 100, 25 points are for class-standing and 75 points for the written term examination.

In the report of grades, the values of the daily recitations and written examination are considered together, and so recorded, and no separate valuation is announced, except when a student fails to take the written examination and is not excused by the Professor, then his daily grade alone is recored.

The student is required to attain 75 per cent. of these combind examinations as set forth above, in order to pass or graduate in any class. However, 60 per cent. will allow him to pass on from one class in the Collegiate Course to the next as a "conditioned" student, but in no case is he allowed to graduate in the Collegiate Course and secure his degree without attaining 75 per cent. in each and every class in the course.

All students are required to attend these written examinations, and if they cannot attain as much as 60 per cent. they are required to quit the class and enter a lower one. If they attain as much as 60 per cent., but fall below 75 per cent., they are permitted to advance, as stated above, being marked on the Professor's record as "conditioned," and before graduating are required to stand such examination over again.

Diplomas.

Diplomas, under the seal of the College, are awarded publicly on Commencement Day to any student attaining an average of seventy-five or more in all the studies required for the M. A. de-

gree in either of the following departments :

1. English.
2. Latin.
3. Greek.
4. Modern Languages (French and German).
5. Mathematics.
6. Natural Sciences.

Degrees.

The Degree of Bachelor of Science is conferred on those who complete, by attaining 75 per cent. of the value of the examinations, the studies enumerated in the course prescribed for this degree under the Courses of Instruction.

The Degree of Bachelor of Arts is conferred on those who complete, by attaining 75 per cent of the value of the examinations, the studies enumerated in the course prescribed for this degree under the Courses of Instruction.

The Degree of Master of Arts is conferred on those who have secured the Bachelor of Arts Degree, and completed the additional studies required.

The Honorary Degrees of Doctor of Divinity, Doctor of Sacred Theology, and Doctor of Law are conferred upon suitable persons by a unanimous vote of the Faculty and Board of Trustees. The College has always been, in a marked degree guarded in conferring these degrees.

Expenses.

FOR TERM OF TWENTY WEEKS.

Tuition in Regular Course	\$25 00
Contingent Fee	5 00
Library Fee	1 00
Washing at College Laundry	6 50
Fuel, two students to a room, each	5 00
Room Rent, two students to a room, each	5 00
Physical Culture Fee	2 50
Apparatus	50

Total College charges per term \$50 50

The above charges are payable in advance to the Treasurer of the College. This must be done, or a definite, satisfactory arrangement made with the Treasurer.

The Board of Trustees two years ago, by a generous provision, enabled the College to offer patrons table-board at \$7.50 per month, which usually and elsewhere costs \$10.00. This board is now furnished by Mr. J. W. Maiden, proprietor of our largest and most convenient boarding-house, "The Byars."

Board per term of twenty weeks	\$37 50
College charges, as above	50 50

Total per term \$88 00

Board is payable monthly in advance.

Board, with furnished room, fuel, light and service may be had at private houses for from \$12.00 to \$15.00 per month.

Students who occupy rooms in the College building provide their own furniture; this will cost on an average of from \$6.00 to \$10.00 each. This furniture will last the careful student as long

as he remains at College, and can be sold at a fair price when he leaves, if well preserved.

No student is allowed, except by special permission, to take more than four daily studies.

No deduction is made in the College charges if a student leaves before the close of the term, unless it be for sickness, and that with the advice and consent of the Faculty.

Funds remitted for the payment of bills should be directed to the Treasurer of the College. Parents and guardians are urgently advised that young men at college have very little need of pocket-money, and in general it would be safest for the student, cheapest for the parent or guardian, and best for the College, to commit the funds of the student to the President, or to one of the professors, who will attend to his wants and discharge his bills. Trouble in the matter of discipline often arises from the fact that some of the students are supplied too freely with money. The College charges, in all cases, are required to be satisfactorily settled before the student will be permitted to enter upon a second term. No student is allowed to graduate, nor will a certificate of honorable dismissal be given, till all arrearages are paid.

Privileged Students.

Tuition fees are remitted in the following cases :

1. Young men giving satisfactory evidence of their intention to preach, and regularly endorse by their respective denominations.
2. The minor sons of ministers of any denom

ination engaged in the regular work of the ministry and dependent upon that for a support.

3. The minor sons of superannuated or deceased members of the Holston Conference M. E. Church, South.

Privileged students are expected to pay all fees except that for tuition. In case of failure to meet these charges, the favor of free tuition will be withdrawn.

Terms and Vacations.

There are two terms in the year. The Fall term begins on the second Wednesday in September. The Spring term begins on Wednesday, the first day of February. The scholastic year closes on Tuesday before the second Wednesday in June. For closing exercises, see Calendar, page 3.

The time appropriated for vacation is believed to be ample for the purpose of relaxation from study; and in view of the unfavorable effect of all absences, either at the commencement or at any other period of the term, upon the standing and proficiency of the student, the Faculty earnestly requests that the parents and guardians in no case encourage, or even sanction, such absences without very urgent reasons.

Text Books.

Private parties have made arrangements to supply all needed text books and stationery at reasonable prices.

Reports.

Three times per term a letter is addressed by the Faculty to the parents or guardian of each

student, reporting his absence from the stated exercises, his general deportment and improvement, and any other information regarding him that seems proper to be given. To accomplish the object of these letters, it is hoped that the friends of the students will apply the encouragement or repression which the letter suggests.

Government.

The discipline of the College first proposes to the student self-government as the highest style of government, and seeks to surround him with a social atmosphere toned with honor, purity and piety. The deportment enjoined for maintaining membership and good standing in the College is defined by the morality of the Bible, the proprieties of gentlemen, and the fitness of our positive rules. The daily assembly of our College community for family instruction and devotion has been found promotive of the *esprit du corps* and sympathy essential to harmony and good order therefore all students are required to be present with the professors in Chapel at daily family worship, which consists in the reading of the Scripture, singing and prayer.

Students are prohibited, on penalty of dismissal, from having or using intoxicating liquors, or deadly weapons, and from organizing, or having active membership in, secret fraternities.

Religious Services.

Rev. J. W. Taylor, Pastor (1897-98).

Public worship is held in the Chapel twice on each Sabbath. At the morning services the pulpit is filled successively by the pastor, President

Waterhouse, Dr. D. S. Hearon and Prof. J. H. Moss. Attendance upon the morning service is required of all students, except such as have special permission to attend church elsewhere.

The evening services are conducted by the ministerial students. In these the young preachers find at once an excellent opportunity for gaining experience and doing good to their fellow students. These occasions are enjoyable and edifying, and although the attendance upon them is wholly voluntary, it is always good.

The Sabbath-School

On Sunday morning, at 9:30 o'clock, the Sabbath School meets, under the superintendency of Prof. J. T. Littleton. This study is according to the schedule of the International Lesson Texts. The professors, assisted by some of the ladies of the community, do the teaching. The influence of the admirable work done here is visible in an enlarged knowledge of the word of God, and in the moral tone which pervades the life of the pupils. While attendance is voluntary, it is strongly urged. Parents may be of great assistance in this work, as the monthly reports show whether or not their sons attend.

Voluntary daily and weekly prayer meetings are found to contribute not a little to the cultivation of religious life among our young men.

Young Men's Christian Association.

L. HARDIN, PRESIDENT.

M. E. STAFFORD, SECRETARY.

It is the aim of this organization to bring young men to Christ and to develop Christian manhood. Its methods are such as have been approved by the most experienced workers. Mem-

bers of the State and International Committees make visits for the purpose of giving advice and encouragement, and delegates from the Association attend State Conventions, College and District Conferences, for the purpose of being spiritually strengthened and learning improved methods.

Voluntary services are held daily, except Saturdays, in the Association Hall. These meetings consist of song, prayer, Bible readings, short talks, varying at the option of the leader. Wednesday nights have been set apart for public prayer meetings, which the people of the community are expected and invited to attend.

The young men conduct the meetings, and nearly all the members take part. Voluntary Bible classes also meet weekly under the leadership of the older members.

Missionary meetings are held monthly, in which some mission field is the topic, and its most important features are discussed by previously appointed speakers, who have access to an excellent missionary library.

Lectures are delivered before the Association by prominent Christian speakers. This year these lectures were delivered by Dr. D. S. Hearon, Rev. Guinn, Dr. C. O. Jones, Dr. J. J. Tigert, Rev. W. I. Akers, Professor Repass, and others.

Special revival services were conducted during the Fall term by Rev. A. N. Jackson, of Bristol Tenn., resulting in great good to the Association.

Reading Room.

The Association conducts and supervises the students' Reading Room. A large, well-lighted room has been set apart for this purpose, and is liberally supplied with the best periodical literature.

It is open to all members of the college on the payment of a fee of \$1.00, partially to defray its expenses.

All students are strongly urged to avail themselves of its manifest advantages.

The work of the various officers and committees, as well as religious work in the community and personal work among the students, affords invaluable training for young Christians.

New students will have a warm reception in our beautiful audience-room at the William Morrow Science Hall. Sectarianism is not known in the Y. M. C. A. movement. The president and secretary invite the correspondence of any who contemplate entering College.

Location.

Our location is in the country. One has said, "God made the country, man made the town." What hinderances to the right education of the young have parents and teachers found in the little village and average town with their gossip, examples of idleness and stealthy allurements to vice? What is a city by day but a great workshop filled with the buzz and whirr of spindles, the clatter of hoofs and wheels, bang of looms, roar of engines, smoke of furnaces, dust and din of trade; and by night, but the same, with business measurably suspended, and itself illuminated and

decorated as a house of pleasure wherein entertainments are given, a few that elevate and refine a multitude that utterly debase and destroy.

Reason may justify the location of a University whose students are mature men, near or within the corporate limits of a city, but to thus locate a college proper is more than a blunder. The country, with its outstretching earth, its over-arching heaven, is God's temple built to soothe and incite the mind, to inspire study.

Our location is in "Old Virginia," in her "great Southwest," in a mountain valley, twenty-one hundred feet above the sea, amid beauty that charms and refines like poetry or music, and in an atmosphere that enriches blood, builds up bone, nerve, muscle, body and brain.

FREEDOM FROM TEMPTATIONS.—The College owns the land for nearly a mile around it, and no one, not even a servant, may come upon the grounds unless adjudged to be a suitable person by the Faculty.

The sale of intoxicating liquors is now prohibited by law in the counties of Southwest Virginia.

ACCESSIBILITY.—The Norfolk and Western Railroad, a part of the great trunk line from the South to the North and East, passes through the College farm, and has a depot on the grounds. Persons coming from the South and Southwest should buy through tickets to Emory, Va.

Emory, Va., is the name of the postoffice, railroad and express station. It is a money-order office.

Our telegraph office is Glade Spring, three

miles distant, with which we are connected by telephone.

Buildings and Grounds.

The main College building, which is a commodious brick edifice of the classic mould of its day, one hundred and fifty by forty-five feet, four stories high, is situated upon a commanding eminence in the Campus. It contains the Treasurer's office, six large lecture-rooms, and forty rooms for students. In the center of this building, on the second floor, is the Chapel, which seats comfortably three hundred persons. It is adorned with two brass memorial tablets, one in memory of the first President, Rev. Charles Collins, D. D., the other in memory of those chivalrous spirits who went from our midst and fell on the field of battle; and especially our illustrious sons, Gen. J. E. B. Stuart and Gen. Wm. E. Jones. The walls are hung with large portraits of the patron saints, Bishop John Emory and Patrick Henry, and with those of all the presidents of the institution, from its foundation to the present, except one.

The Byars House is the College boarding-house and hotel. The building is of modern style, beautiful and convenient. It is kept by Mr. J. W. Aiden.

The halls of the Calliopean and Hermesian Literary Societies occupy the whole of the third floor of this building. These halls are finely finished and superbly furnished. They are beautified by the contributions of cultured taste and a liberal expenditure of means, so that they are unsurpassed, possibly unequalled, by any halls of similar use in the nation. Here these celebrated

societies, under the guidance of a progressive leadership, and impelled by the stirring and ennobling memories of a half century, meet once every week for forensic discussions, and to use other means for literary cultivation and manly development.

The Sam. W. Small Gymnasium is a large, octagonal building, named for the noted evangelist whose public spirit and liberality were the largest contributors. The building is constructed with reference to a double use, viz.: during the session, for bodily exercises, and at the close, as a public auditorium. Its seating capacity is about sixteen hundred.

The Wm. Morrow Science Hall is named in honor of that philanthropic, generous Christian gentleman, Dr. William Morrow. It contains a Chemical Lecture room, Chemical Laboratory, Physical Lecture room, Cabinet of Minerals and Fossils, Apparatus rooms, rooms for Chemical Calculus; also lecture tables, students' working tables of the most approved modern pattern, gas chambers with ventilating flues, etc. The building is supplied with gas for heat and light. It furnishes excellent advantages for instruction both theoretical and practical, in Chemistry, with opportunities for analysis, for determination of minerals, for assaying, for physical experiments etc. It is built of brick, covered with metal shingles, and presents a handsome appearance in modern style.

The Campus contains twenty-two acres set in blue grass. At the east end is the famous spring not to be forgotten by any one who has seen it.

furnishing an abundant supply of the purest water.

Just without and encircling the Campus are the houses and grounds of the professors.

The College is near the center of the College farm, which contains over five hundred acres.

Library.

The College Library numbers now about nine thousand volumes, among which are many rare and valuable books. Recently the library rooms were enlarged in furnishing and number, the books carefully re-arranged and our catalogue revised, so that the volumes are much more readily and easily utilized.

Contributions should be sent to the Librarian, to whom all such donations will be promptly acknowledged. Duplicate copies of good books, new or well preserved, are always useful and acceptable.

This being a Government depository, the library receives all the issues of the United States Government Press.

Readings, Concerts and Lectures.

During the session there will be given in the chapel a number of concerts, readings and lectures by the best talent that can be commanded. Such exercises have proved a source of great amusement and instruction to the students. It is our aim to carry on and improve this work in the future.

Literary Societies.

The Calliopean and Hermesian Societies have a history coeval with that of the College. In their management and character they challenge

comparison with those of any other institution in the land. Many of the young men now directing them are the sons of men who in other years were active members. We deem it a matter of very great importance to foster them and to protect them from all influences that would impair their usefulness or endanger their permanency. Hence our objections to secret fraternities of all sorts. As now conducted, the Societies furnish the finest opportunities for practice and improvement in forensic discussions, elocution and English composition. Their halls are very commodious and well furnished. During the session a Public Debate is held by each Society. For dates of Public Debates see Calendar.

English Scholarships.

Through the liberality of LEON JOUROLMON ESQ., of Knoxville, Tenn., two scholarships have been established to stimulate the study of the English language, and to promote productive work in English.

These scholarships are worth one hundred dollars each to the successful contestants, and are awarded to no one who has not completed the prescribed course in English through the Sophomore year, and made a grade of ninety per cent. on the work required, and pass on at least two other regular studies.

Shoemaker Scholarships.

COL. J. L. SHOEMAKER, who died in Gate City, Va., January, 1894, and whose will was probated in Scott County Court the 14th day of February, 1894, left to Emory and Henry College some eig-

ten thousand dollars of his estate for the purpose of establishing free scholarships for poor and deserving young white men. His will appoints trustees of the fund and allows them to pay out of the annually accruing interest the tuition of each beneficiary, and also appropriates a sum to buy necessary books and stationery. The trustees are Hon. J. B. Richmond and R. C. Strong, Esq., of Gate City, Va., and Patrick Hagan, Esq., of Langannon, Va.

Under the laws of the State only Virginians can receive the benefit of the fund, and all applications should be made to above trustees.

Col. Shoemaker showed great wisdom in establishing this form of endowment. If the fund is carefully preserved and administered, hundreds may rise up to bless his name and memory. The College earnestly hopes that other friends of Christian education may follow his example, thus enabling the institution to reach and educate a mass of young men most deserving and whose education promises much to both church and State.

Prize Medals.

1. For the encouragement of proficiency in oratory there has been established, through the liberality of WYNDHAM ROBERTSON, ESQ., a sufficient and permanent fund, of which the income, in the form of a gold medal, with expressive sentiments and emblems, is bestowed at each Annual Commencement upon the students in the Junior or Senior Class who excel in composition and oratory.

2. The Collins Prize for excellence in Eng-

lish Composition, founded by the late REV. CHARLES COLLINS, D. D., first President of the College, is to be awarded in the form of a gold medal.

3. To increase interest and promote scholarship in the Natural Sciences, a gold medal is annually awarded to the student who attains the highest grade in this department. The medal is furnished from a permanent fund established by the late COL. WILLIAM BYARS.

Candidates for the prizes in Natural Science must attain to a required standard of proficiency in Botany, Natural Philosophy, Geology, Mineralogy and Chemistry.

4. During the session '88-'89 COL. FRANK E. WILLIAMS, a graduate of the College, donated a permanent fund, the income from which is to furnish a handsome medal for Declamation, to be awarded to the best declaimer in the Freshman and Sophomore classes.

The Society of the Alumni.

This Association, composed of all the graduates of the College and of such other former students as may be elected members at the annual meetings, now numbers nearly six hundred, and is an important and interesting feature in the history and work of the College. It has its representatives in all parts of our Southern and Western country, also in Mexico, South America, Japan and China. Its annual meetings, held in June of each year, have been occasions of great interest. From their number one is selected to address the Society annually. The fires of youthful enthusiasm are rekindled from a common altar

they meet to renew the memories of the past, and pledge to each other afresh the friendships begun in earlier days. In addition to these pleasing features, the object of the Society is to advance the interest of the College and promote letters and progress.

Honors.

The following students, having attained the highest average grades, were appointed monitors for the session of 1897-98 :

Fall Term.

- | | |
|--------------------|--------------------|
| 1. H. M. CARRIGER. | 3. CLYDE GWYNN. |
| 2. C. L. GUTHRIE. | 4. J. F. JOHNSTON. |

Spring Term.

- | | |
|--------------------|--------------------|
| 1. H. M. CARRIGER. | 3. C. L. GUTHRIE. |
| 2. J. F. JOHNSTON. | 4. W. C. CARRIGER. |

Honors Conferred June, 1897.

First Honor in Senior Class:

W. P. BUHRMAN, Va.

Second Honor in Senior Class:

C. W. CRAWFORD, Tenn.

Wyndham Robertson Prize in Oratory:

C. W. CRAWFORD, Tenn.

Collins Prize for English Composition:

W. P. BUHRMAN, Va.

Frank E. Williams Prize for Declamation:

H. C. MALONEY, Tenn.

William Byars Science Medal:

SAMUEL W. EDMONDSON, Va.

Leon Jourolmon English Scholarships:

W. W. BELEW, Va.

E. H. FULTON, Va.

Calliopean Medalists, June, 1897:

DEBATER—S. W. EDMONDSON, Va.

Endowments.

The College has a few thousand dollars of productive endowment which is slowly increasing, and like all institutions of its grade, stands in need of much more than it has or is getting.

Form of Legacy.

I give and bequeath to the Trustees of Emory and Henry College, at Emory, Virginia, the sum of.....dollars, for the benefit of said institution.

SCHEME OF DAILY RECITATIONS.

GENERAL STATEMENTS.

It is a well recognized fact that no fixed and rigid curriculum can be adapted to the varying requirements of different students, and the College therefore offers a variety of courses leading to the degrees of B. A., B. S., and M. A.

These courses differ chiefly in the relative importance assigned to Classics on the one hand, and to Modern Languages and Scientific Studies on the other.

The average student will find it greatly advantageous to enter one of these regular courses and pursue the studies in their natural order.

Classes meet five times a week; forty-five minutes is allowed to each recitation.

Requirements for Admission.

Students from other chartered institutions must bring a certificate of honorable dismissal.

Applicants for admission to any of the College classes are required to give satisfactory evidence, by examination or otherwise, of their fitness therefor, and candidates for admission to an advanced class in any course for graduation are required to make up any deficiencies in subjects which precede the point of entrance. The importance of thorough and uniform preparation in elementary studies is urged upon all.

The requirements for admission to the Freshman classes are briefly summarized by subjects as follows:

English.—A good knowledge of Grammar and of United States History.

Latin.—Two books of Cæsar and two orations of Cicero or its equivalent, with exercises and Grammar in corresponding amount.

Greek.—White's Beginner's Greek Book, Anabasis.

Mathematics.—The student should have had a thorough drill in the fundamental operations of Algebra, including some knowledge of the simpler forms of quadratic equations, and be well versed in the elements of Plane Geometry, including the original solution of exercises. Milne's, Venable's or Well's High School Algebra and the first three books of Wentworth's, Venable's, Wells' or Macnie's Plain Geometry are recommended for this work.

Science.—Physical Geography.

COLLEGIATE COURSES.

For the degree of Bachelor of Arts the following groups of studies are recommended:

I.

Freshman Year.

Fall Term

Latin
Greek
Mathematics
English

Spring Term

Senior Year.

Logic, Psychology
Political Economy

Psychology, Ethics

Three other subjects must be selected from the following:

Chemistry
Physics
Mathematics
Mineralogy and Geology

Chemistry
Physics
Mathematics
Mineralogy and Geology

Notes.

1. For Courses in History see departments of Latin, Greek English, French and German; and for the fullest information concerning the work provided for in each department read carefully what is written by the respective heads of these departments.

2. Any student applying for admission to the Junior Class will be required to pass examinations on those subjects of the Sophomore year leading to his degree which he does not propose to study during the Junior Year.

In addition to the above studies, regular exercises in Declamation are required of all students except the Junior and Senior Classes, and these are required to deliver original orations in the Chapel before the Faculty and students. These orations must be handed to the President for revision and correction during the months of November, February and March, and must be delivered at the times he appoints. Three are required of each Senior, and one of every Junior.

THE Departments and Methods.

PSYCHOLOGY AND ETHICS.

PRESIDENT WATERHOUSE.

The plan adopted in this department is a discreet combination of the recitation and the lecture. Pupils are required to make careful preparation upon the texts assigned for daily work. The subject matter of recitation is made the basis of the lecture, which contemplates the double purpose of inspiring original thought and of leading the pupil into the wider literature of the subject in hand.

Text Books.—Moral Science, Valentine or McKenzie; Mental Science; Elements of Psychology, by Noah K. Davis.

POLITICAL ECONOMY AND LOGIC.

These subjects are also assigned to the President, but in teaching them he receives valuable assistance from other members of the Faculty. It is hoped to make the study of these sciences a source of much pleasure and profit to the pupil.

Text Books.—Political Economy, Walkers; Deductive Logic, Noah K. Davis.

ENGLISH.

PROFESSOR LITTLETON AND MR. COLE.

Attention is invited to the four years' course of English offered below. While the course is closely

connected and progressive, each year's work is fairly complete in itself. Hence the demands of those young men who can go to college only one, two or three years are met.

Each class has in view both the linguistic and the literary departments into which the collegiate study of English naturally divides itself. Accordingly, while a knowledge of the grammar, the rhetoric and the development of the English tongue are being acquired, both by drill in text-books and by practice in composition, a personal acquaintance with some of the masters of English prose and verse is being made, not from text-books upon literature, not by cramming the opinions of others; but by reading at first hand the authors themselves. Thus, during the formative period of college life, it is hoped that the taste for what is true and beautiful, uplifting and strengthening, in the foremost language of the world, will be so formed and cultivated that it will, whatever be the course taken in after life, be productive of good.

Freshman Year.

The work of the Fall term is a review of English Grammar, an introduction to Rhetoric, a study of English history, parallel reading and weekly exercises in composition and American literature.

With the substitution of Grammatical Analysis for Grammar, the work of the Fall term is continued through the Spring term.

Text Books.—English Grammar by lecture; Rhetoric; History; Tom Brown's School Days; Pancoast's Introduction to American Literature; Lamb's Tales from Shakespeare; Irving, Longfellow, Bryant.

Sophomore Year.

Throughout the entire session the practical application of Rhetoric to literary work is carefully studied. During the Fall term the literature of England is studied in a condensed form, which gives place to a study of specimens of English and American literature in the Spring term. There are in connection with the Rhetoric, throughout the session, fortnightly compositions upon assigned subjects.

Text Books.—Newcomer's Rhetoric; Pancoast's Introduction to English Literature; Tom Brown at Oxford; The Vicar of Wakefield; Hawthorne; Lowell; Poe, and Scott.

Junior Year.

The Fall term is devoted to the study of Anglo-Saxon, the origin and development of modern English, and to a critical study of the prose of Webster, Burke and other American and English orators. Parallel reading is assigned from Dickens, George Eliot and Scott.

The study of Anglo-Saxon continues through the Spring term. The drama and poetry form the subject of the literature studies of this term. The following are read, some in class and some as parallel: Three plays of Shakespeare; Tennyson and Milton. Monthly essays during the whole session. These count as one-third of the year's work.

Text Books.—Smith's Old English Grammar; Shakespeare; Tennyson; Dickens; George Eliot; Scott; Milton; Orations and Arguments, Bradley; Johnson's English Words.

Senior Year.

Fall Term.—Philology and the history and growth

of language are studied by suitable text-books, and by practice in Old English.

Text Books.—Bright's Anglo-Saxon Reader or Kent's Elene; Peile's Philology; Whitney's Language and the Study of Language; Chaucer or Piers Plowman; Sweet's History English Grammar.

Spring Term.—DeQuincey, Ruskin, Shakespeare, Tennyson or Browning are studied partly with and partly without the teacher's aid.

Essays.—Four essays are required during the year. Subjects for session 1899-1900: Shakespeare's Brutus; Mrs. Ward's Marcella; The Decline of Spain; Some Dangerous Tendencies in American Politics. For either of the above, an original poem or story may be substituted.

ANCIENT LANGUAGES.

PROFESSOR JONES AND MR. COLE.

In the work of this department quality rather than quantity receives emphasis, but there is no disposition to disregard the reasonable claims of a college course as to range and variety. The courses of reading are of sufficient fullness and scope to secure to the student that completes them a fair reading power, and, in addition, a considerable acquaintance with the best classic authors. Much importance is attached to syntactical study, which, beginning with the text-book, is made real to the student by constant illustration from the authors read and by weekly exercises in prose composition. The study of the history and literature of Greece and Rome is regarded indispensable, and prosody receives proper consideration. Private reading in the original, in English translations, or in spe-

cial treatises on classical subjects may be assigned as seems best in any class.

LATIN—Freshman Year.

For entrance the equivalent of two books of Cæsar, and two orations of Cicero, with a corresponding amount of work in Grammar and Prose Composition, is required.

Text Books.—Selections from Ovid (Shuckburgh), Vergil's *Æneid* (Greenough and Kittredge), Cicero's Orations (Kelsey), Grammar and Prose Composition (Bennett).

Sophomore Year.

Text Books.—Selections from Latin Poets (Crowell), Livy (Greenough and Peck), Agricola and Germania of Tacitus (Hopkins), Grammar (Allen and Greenough), Prose Composition (Miller), History of Rome (Myers).

Junior Year.

Text Books.—Captivi of Plautus (Hallidie), Phormio of Terence (Elmer), Horace (Shorey—Kirkland), Cicero, selections from letters, philosophical or rhetorical works, Grammar (Allen and Greenough), Prose Composition (Miller), Roman Literature (Bender).

Senior Year.

The aim of the work in this year will be to complete that of the three preceding years by studying the language and literature of the early, classic and later periods in their relations to each other. The reading, embracing remnants of early Latin and authors of the decadence, may vary much from year to year.

GREEK—Freshman Year.

For entrance a good knowledge of the forms, fair acquaintance with the elements of syntax, and consid-

erable practice in the translation of simple prose and in prose composition are required.

Text Books.—Xenophon's Anabasis (Goodwin and White), Lysias (Bristol or Morgan), Grammar (Hadley and Allen), Prose Composition (Pearson), Greek History (Myers).

Sophomore Year.

Text Books.—Philippics of Demosthenes (Tarbell), Apology of Plato (Dyer), The Iliad (Keep), Grammar (Hadley and Allen), Prose Composition (Sidgwick), Greek Literature (Jebb).

Junior Year.

Text Books.—Antigone of Sophocles (D'Ooge), Medea of Euripides (Allen), Clouds of Aristophanes (Humphreys), De Corona of Demosthenes (Holmes), Grammar (Hadley and Allen), Prose Composition (Sidgwick).

Senior Year.

The courses in this year, as in the corresponding year in Latin, will be flexible, but rather literary than linguistic. The student will seek a wide acquaintance with classic authors, and will concern himself also with the significance of Greek culture in relation to that of later times.

MODERN LANGUAGES.

PROFESSOR LITTLETON AND MR. MILLER.

FRENCH—Preparatory.

Whitney's Practical Grammar, Prose Composition; François; Super's Reader, Barnes' Brief History.

Junior Year.

Whitney's Grammar completed; Prose Composition; Victor Hugo, and other writers of the nine-

teenth century; Herdbr's Scientific French Reader; Literature.

Senior Year.

Sauveur's Grammaire Française pour les Anglais; Causeries avec mes Elives; George Sand; Victor Hugo; Corneille; Racine; Molière. Lectures upon the History of the Language.

GERMAN—Preparatory.

Edgren & Fossler's Brief Grammar; Stein's Exercises; Grimm's Maercheu; History.

Junior Year.

Thomas's Grammar; Stein's or Harris's Prose Composition; A Science Reader; Schiller, and some modern tale or poem.

Senior Year.

Thomas's Grammar completed; weekly exercises in composition; Keller's Bilder aus der deutschen Litteratur; Goethe; Lessing, and some modern poem or novel.

MATHEMATICS.

PROFESSOR MILLER.

For admission to the College course, the student should have a thorough knowledge of Elementary Algebra, embracing the simpler forms of quadratic equations and of the elements of Plane Geometry, including some practice in the solution of exercises.

In all classes especial emphasis is laid upon the solution of problem and exercises, both as a means of impressing principles on the mind and as tending to promote the development of accurate and independent thought. Accuracy of knowledge is first sought, and after this as wide an acquaintance with different branches of the subject as the limit of time will allow.

The classes are grouped as follows:

Freshman Year.

Algebra, embracing theory of Quadratic Equations, Imaginaries, Variation, Progressions, Binomial Expansion, Logarithms; Plane and Solid Geometry.

The classes in Geometry are so arranged that students who have not studied the subject can enter the sub-Freshman class in the Fall and continue the study uninterruptedly throughout the scholastic year.

Text Books.—Philip's & Fisher's Geometry; Wells' College Algebra.

Sophomore Year.

Plane and Spherical Trigonometry, including practice in the use of logarithmic tables and applications to problems of heights, distances, etc.

Geometrical Analysis.—This course includes a brief review of the more important theorems and loci of plane geometry and exercises in applying the same to problems of geometrical constructions. This in turn is followed by a brief course in Geometric Conic Sections.

Algebra, including Permutations, Combinations, Series, Theory of Notation, the Elements of Determinants and General Properties of Equations.

Text Books.—Wells' New Plane and Spherical Trigonometry, Venable's Geometrical Exercises and Conic Sections, Wells' College Algebra.

Junior Year.

The work of this class is divided between the subjects of Analytical Geometry and Calculus—a half year being devoted to each. The elementary principles of the Differential and Integral Calculus are studied and illustrated by applications to simple problems of Physics and Mechanics.

Text Books.—Bailey & Wood's Analytical Geometry, Osborne's Calculus, or a book of like grade.

Senior Year.

Analytical Geometry of three dimensions, Differential and Integral Calculus, with numerous applications to problems of Physics and Mechanics, and selected chapters from the Theory of Equations. A brief course in History of Mathematics is read as parallel.

Text Books.—Venable's Notes on Solid Geometry, Todhunter's Differential Calculus, Williamson's or Byerly's Integral Calculus.

Surveying.—Instruction in this subject, which includes Plane Surveying and Leveling, extends through the Spring term and is furnished by text-books, by lecture, and by associated field work. In the lecture-room the student is taught the general theory of Compass and Transit Surveying, and is well drilled in the solution of the fundamental problems arising in the practice of the same.

Especial prominence is given to the field work, and the student is made familiar with the use of the instruments in measuring and parting off areas, determining the length and azimuth of inaccessible lines, re-running old surveys, etc. For instruction in this subject the department is well equipped with good instruments, including a vernier compass, a combined transit and level, with vertical arc and stadia wires, leveling rod, steel tapes, chains, etc.

The work is arranged to meet the wants of those students who desire a knowledge of the subject merely as a branch of scientific education, and also of those who desire to become practical surveyors. The latter

will be required to pursue a more extended course in drafting and map-making, and to this end will find it necessary to purchase drawing instruments and material costing from \$10.00 to \$15.00.

Students of the surveying class are charged \$1.00 for the use of instruments.

Text Books.—Raymond's Surveying; Notes.

Advanced Physics.

During the first half year this class will make a systematic study of Electricity and Magnetism, or of Sound and Light, and also have some opportunities for associated laboratory work as soon as facilities for this can be provided. The last term will be given to the subject of Astronomy. The same is designed to give an accurate conception of as many of the fundamental facts and principles of the science as the limit of time will allow.

For entrance to this class it is necessary that the student should have done the work of the Junior class in Mathematics, and also that of the class in General Physics, or their equivalents.

Text Books. — Young's General Astronomy. Other books announced later.

NATURAL SCIENCES.

PROFESSOR JARMAN.

CHEMISTRY.

A three years' course is given in this subject.

Sophomore Year.

Lectures and recitations, three hours a week.

Inorganic Chemistry is taught, embracing a study of chemical nomenclature, chemical formulae, the laws regulating combination of substances, both by weight and volume, the history and description of the

elementary substances, both non-metallic and metallic, with their compounds. The Atomic Theory is discussed briefly.

The last quarter of the session is devoted to a brief study of the representative classes of the Aliphatic Compounds of Carbon.

Laboratory work is required throughout the session, six hours a week.

Inorganic Preparations, embracing a thorough study of the properties of the more common elements and their compounds in groups according to the Periodic Law.

A short course in Qualitative Analysis, according to the dry method, is also given.

Text Books.—Remsen's Briefer Course in Chemistry; Remsen's Laboratory Manual; Remsen's Organic Chemistry; Blow-pipe Analysis (—).

Junior Year.

Lectures and recitations, three hours a week. This course begins with a study of Theoretical Chemistry, embracing a more extensive study of the Atomic Theory, Solutions, Periodic Law, Valency, Molecular Weight Determinations, etc., followed by a careful study of both the Aliphatic and the Aromatic Compounds of Carbon, and concludes with a study of the constitution or structure of compounds, both Inorganic and Organic. Laboratory work, six hours a week.

Three months are devoted to the completion of the course in Qualitative Analysis, begun in the Sophomore year.

The remainder of the session is taken up with the preparation of the Organic Compounds, representa-

tives of the different classes, with a view to a thorough understanding of their relations.

History of Chemistry is assigned as parallel.

Text Books.—Remsen's Theoretical Chemistry; Remsen's Organic Chemistry; Fall's Laboratory Manual; Venable's History of Chemistry.

Senior Year.

Analytical Chemistry, ten hours a week. The work of this year is done mainly in the laboratory. From time to time, lectures on Quantitative Methods will be given.

Thorough drill is given in both Gravimetric and Volumetric Analysis. Complete analyses of ores, minerals, slags, clays, etc., are made; also some work in Assaying.

This year's work is varied somewhat to meet the demands of the student.

Some elementary research work is done.

Text Books.—Talbot or Clowes and Coleman, Rickett's Fire Assaying.

Reference Books.—Fresenius' Quantitative Analysis.

GENERAL PHYSICS.

This class meets five times a week throughout the entire session.

The instruction is given by recitations from text books, illustrated by suitable experiments.

In the Fall term the course consists of the discussion of the Laws of Motion, and Force and Energy as applied to Solids, Liquids and Gases. Problems are given from time to time illustrating the practical application of the laws governing the science.

In the Spring term, Molecular Physics is dis-

cussed—Heat, Light, Sound, and Electricity. While due prominence is given to principles, frequent reference is made to the application of the science.

It is hoped that during the next year this department will be so equipped that a Laboratory course may be given as supplementary to the work done in the class room.

Text Books.—Ame's Theory of Physics.

In addition to regular tuition fee, students pay one dollar per term for use of apparatus.

A second year's course is given in this subject. See Department of Mathematics.

MINERALOGY.

This subject is studied in the Fall term, and is taught by recitation from the text books and by practical work done in the Laboratory in connection with Sophomore Chemistry, which is required for admission to this study. The Theoretical course embraces a brief study of Crystallography. The students become familiar with the different forms by studying models which are furnished them, thus enabling them to recognize the simpler crystalline forms. The chemical and physical properties, mode of occurrence, etc., of the minerals are also made prominent. The Laboratory course embraces a study of Blow-pipe Analysis and Determinative Mineralogy.

Text books for the above course are as follows:

Dana's Manual of Mineralogy; Foye's Hand Book of Mineralogy.

GEOLOGY.

Geology is studied in the Fall and Spring term.

Dynamical, Structural and Historical Geology are taught in the order in which they are discussed in

the ordinary text books, the chief aim being to drill the student in the theory of science.

Text Books.—William B. Scott's Introduction to Geology.

PHYSIOLOGY.

In this study the students acquire a knowledge of the properties and actions of the various organs of the human body in their normal condition, together with their functions. Anatomy is taught only so far as is essential to a clear understanding of the use and mode of working of each part of the body. This subject extends through the Fall term, and is illustrated with an excellent manikin.

Text Books.—Walker's Anatomy, Physiology and Hygiene, and extensive Anatomical Charts.

BOTANY.

This subject is taught throughout the Spring term. The student is taught the form and structure of the plants, the functions of the different organs, the relationship of plants to each other, etc. The aim of the course is to train the student's observing faculties and give him an intelligent interest in plant life.

In a short time it is expected that a Biological Laboratory will be equipped, when a course in Practical Biology will be given.

Text Books.—Bergen's Elements of Botany; Gray's Field and Forest Botany.

CHARGES PER SESSION FOR LABORATORY.

Courses.	*Deposit for Apparatus.	Material.
Sophomore year.....	\$5 00	\$10 00
Junior year.....	5 00	15 00
Senior year.....	5 00	20 00

*Students are charged with what Apparatus they break and for use of Apparatus; the balance is refunded them.

PREPARATORY DEPARTMENT.

This Department the College has found essential to its work from the beginning, and it will doubtless continue to be for many years. To young men ready for collegiate work in all studies except Greek and Latin, it furnishes advantages far superior to those of the coaching system resorted to in some colleges.

To parents intending to send their boys from home because they have no good academy or high-school convenient, or because they need the stimulus of an educational atmosphere and new surroundings, this department also offers superior advantages. In fact, except where the best advantages are given, it is greatly to the interest of the student to spend his preparatory years with us, because in the absence of a careful drill in the elementary branches thorough mastery of a college course is impossible, and hence many a boy's taste for books is lost and his future as a scholar blighted.

Realizing the importance of this department, we are endeavoring to make it more efficient. We now have, as a part of its equipment, a Study Hall, furnished with tables and chairs, and provided with an instructor who hears no classes, but keeps order and gives the individual pupil aid in the mastery of his lessons. Every class is taught by an experienced teacher, and Prof. J. W. Cole, under the supervision of the Faculty, is charged with special responsibility for the order and progress of the department. Prof. Cole has his home with those boys who room in the college buildings, and is thereby enabled the better to superintend all the interests of this department.

The course consists of two years, as given below:

Those entering the first year are expected to be proficient in Elementary English Grammar, Geography, and Arithmetic through Denominate Numbers, Common and Decimal Fractions. The following is the course for two years:

Preparatory Course.

For those whose advancement does not exceed the above requirements we form classes in beginning Latin, Elementary Algebra, Practical Arithmetic, English Grammar and State History.

Text Books.—Collar and Daniel's Latin Grammar; Southworth and Goddard's Elements of Composition and Grammar; Cook's History of Virginia; Venable's Practical Arithmetic; Milne or Venable's High School Algebra.

Second or Sub-Freshman Year.

Fall Term

Geometry
Latin Grammar and Cæsar
Maxwell's English Grammar
Lee's U. S. History
Greek Grammar
Physical Geography

Spring Term

Algebra
Latin Grammar and Cicero
Maxwell's English Grammar
Lee's U. S. History
Greek Xenophon
Physiography

Text Books.—Houston's Physical Geography; Thornton's Physiography; Phillips' and Fisher's Geometry; Venable's Practical Arithmetic and Easy Algebra; Milne's High School Algebra; Whitney's Essentials of English Grammar; History of the United States; White's Beginner's Greek Book.

Tuition charges in this department are: Preparatory year, \$15.00; Sub-Freshman, \$20.00. Board, washing, fuel, etc., are same as in Collegiate depart-

ment, making the total, including board, \$146 and \$156 per year.

Physical Culture.

J. L. HARDIN, INSTRUCTOR.

“A sound mind in a sound body.”

After virtue, there is nothing upon which the happiness and usefulness of men so much depend as upon the conditions of the body. While this fact is well known to all intelligent and experienced persons, it is a matter of which the young are hurtfully and almost universally ignorant. One of the first aims, therefore, of this department will be to impart to the pupil a proper conception of the value and sacredness of the body as the home, the working place and the instrument of the spirit.

All pupils entering the College are expected to take such work in this department as their needs may demand, unless excused by the physician or the Faculty.

When necessary, a physical examination will be given, and measurements and weights taken and recorded, so that the teacher may be prepared to modify the exercises to suit the special needs of pupils, and thereby build up the health and tone of each. All exercises will be under the supervision of the teacher, and individual instructions will be given when needed.

There will be four drills in the Gymnasium each week, the time for this work being from four to six o'clock in the afternoon.

There will be two field days for Athletic Sports during the season. The system is strictly one of light weight exercises, thus avoiding all danger of strain or rupture.

The following is an outline scheme of the work done:

1. Breathing exercises. 2. Daily work with light dumb-bells. 3. Club swinging. 4. Practice with fencing sticks. 5. Body movements without weights. 6. Walking and running exercises. 7. Work with wall machines.

Special attention is given to the work on the wall machines, as it is believed that a more systematic development can be obtained from this exercise than from any other work in the Gymnasium.

To this will be added instructions on the Campus in base-ball, tennis, and other approved games.

The place for the indoor work of this department is the

SAM SMALL GYMNASIUM.

The building has capacity for seating sixteen hundred people. It is octagonal in shape, has five large doors, twenty double hung windows, and gable and dome ventilation, so that the air within is as fresh as that without.

The place for out-of-doors work is the beautiful

COLLEGE CAMPUS,

which embraces twenty-one acres of shaded and open lawn set in blue grass, and contains a bold and gushing spring of the best water known in this land of celebrated waters. The Campus, in addition to being a superb place for manly exercises, is a delight to the eye, and refining in its influence upon the mind.

There has always been a marked physical improvement among the students during each session in weight, strength, and increase of lung power, and in general freedom from sickness.

The fee in the department of Physical Culture is \$2.50 per term of five months, and must be paid unless a student is excused on physician's advice.

For the further promotion of Physical Culture, an Athletic Association has been organized, and under its auspices come the Field-Day contests referred to above. Suitable prizes for running, jumping, putting the shot, throwing the base ball, etc., are given to the successful contestants. and their record carefully preserved.

Examinations.

In addition to the examinations at the daily recitations, special examinations are conducted in writing at or near the end of each term. These special written examinations cover the subjects gone over during the whole term, and are made fair, yet searching, tests of the student's knowledge.

In the final valuation of grades, for all promotions, honors and diplomas, the class standing of students is taken into account, as kept from day to day by the different professors, and is valued at 25 per cent., while the written examination at the end of each term is valued at 75 per cent., *i. e.*, out of a possible hundred, 25 points are for class-standing and 75 points for the written term examination.

In the report of graduates, the values of the daily recitations and written examination are considered together, and so recorded, and no separate valuation is announced, except when a student fails to take the written examination and is not excused by the Professor, then his daily grade alone is recorded.

The student is required to attain 75 per cent. of these combined examinations as set forth above, in order to pass or graduate in any class. However, 60

per cent. will allow him to pass on from one class in the Collegiate Course to the next as a "conditioned" student, but in no case is he allowed to graduate in the Collegiate Course and secure his degree without attaining 75 per cent. in each and every class in the course.

All students are required to attend these written examinations, and if they cannot attain as much as 60 per cent. they are required to quit the class and enter a lower one. If they attain as much as 60 per cent., but fall below 75 per cent., they are permitted to advance, as stated above, being marked on the Professor's record as "conditioned," and before graduating are required to stand such examination over again.

Diplomas.

Diplomas, under the seal of the College, are awarded publicly on Commencement Day to any student attaining an average of seventy-five or more in all the studies required for the M. A. degree in either of the following departments:

1. English.
2. Latin.
3. Greek.
4. Modern Languages (French and German).
5. Mathematics.
6. Natural Sciences.

Degrees.

The Degree of Bachelor of Science is conferred on those who complete, by attaining 75 per cent. of the value of the examinations, the studies enumerated in the course prescribed for this degree under the Courses of Instruction.

The Degree of Bachelor of Arts is conferred on those who complete, by attaining 75 per cent. of the value of the examinations, the studies enumerated in the course prescribed for this degree under the Courses of Instruction.

The Degree of Master of Arts is conferred on those who have secured the Bachelor of Arts Degree, and completed the additional year's studies required by Faculty.

The Honorary Degrees of Doctor of Divinity, Doctor of Sacred Theology, and Doctor of Laws are conferred upon suitable persons by a unanimous vote of the Faculty and Board of Trustees. The College has always been, in a marked degree, guarded in conferring these degrees.

Expenses.

FOR TERM OF TWENTY WEEKS.

Tuition in Regular Course	\$25 00
Contingent Fee	5 00
Library Fee	1 00
Washing at College Laundry	6 50
Fuel, two students to a room, each	5 00
Room Rent, two students to a room, each	5 00
Physical Culture Fee	2 50
Apparatus	50

Total College charges per term	\$50 50
--	---------

The above charges are payable in advance to the Treasurer of the College. This must be done, or a definite, satisfactory arrangement made with the Treasurer.

The Board of Trustees, by a generous provision, has enabled the College to offer patrons table-board at \$7.50 per month, when paid monthly in advance; or \$6.50 when paid per term in advance, which usually

and elsewhere costs \$10.00. This board is now furnished by Mr. J. W. Maiden, proprietor of our largest and most convenient boarding house, "The Byars."

Board per term in advance	\$32 50
College charges, as above	50 50
	<hr/>
Total per term	\$83 00

Board is payable monthly in advance.

Board, with furnished room, fuel, light and service may be had at private houses for from \$12.00 to \$15.00 per month.

Students who occupy rooms in the College building provide their own furniture; this will cost on an average of from \$6.00 to \$10.00 each. This furniture will last the careful student as long as he remains at College, and can be sold at a fair price when he leaves, if well preserved.

No student is allowed, except by special permission, to take more than four daily studies.

No deduction is made in the College charges if a student leaves before the close of the term, unless it be for sickness, and that with the advice and consent of the Faculty.

Funds remitted for the payment of bills should be directed to the Treasurer of the College. Parents and guardians are urgently advised that young men at college have very little need of pocket-money, and in general it would be safest for the student, cheapest for the parent or guardian, and best for the College, to commit the funds of the student to the President, or to one of the professors, who will attend to his wants and discharge his bills. Trouble in the matter of discipline often arises from the fact that some of the students are supplied too freely with money. The College charges,

in all cases, are required to be satisfactorily settled before the student will be permitted to enter upon a second term. No student is allowed to graduate, nor will a certificate of honorable dismissal be given, till all arrearages are paid.

Privileged Students.

Tuition fees are remitted in the following cases:

1. Young men giving satisfactory evidence of their intention to preach, and regularly endorsed by their respective denominations.

2. The minor sons of ministers of any denomination engaged in the regular work of the ministry and dependent upon that for a support.

3. The minor sons of superannuated or deceased members of the Holston Conference M. E. Church, South.

Privileged students are expected to pay all fees except that for tuition. In case of failure to meet these charges, the favor of free tuition will be withdrawn.

Terms and Vacations.

There are two terms in the year. The Fall term begins on the second Wednesday in September. The Spring term begins on Wednesday, the last day of January. The scholastic year closes on Tuesday before the second Wednesday in June. For closing exercises, see Calendar, page 3.

The time appropriated for vacation is believed to be ample for the purpose of relaxation from study; and in view of the unfavorable effect of all absences, either at the commencement or at any other period of the term, upon the standing and proficiency of the

student, the Faculty earnestly requests that the parents and guardians in no case encourage, or sanction, such absences without very urgent reasons.

Text Books.

Private parties have made arrangements to supply all needed text books and stationery at reasonable prices.

Reports.

Three times per term a letter is addressed by the Faculty to the parents or guardian of each student, reporting his absence from the stated exercises, his general deportment and improvement, and any other information regarding him that seems proper to be given. To accomplish the object of these letters, it is hoped that the friends of the students will apply the encouragement or repression which the letter suggests.

Government.

The discipline of the College first proposes to the student self-government as the highest style of government, and seeks to surround him with a social atmosphere toned with honor, purity and piety. The deportment enjoined for maintaining membership and good standing in the College is defined by the morality of the Bible, the proprieties of gentlemen, and the fitness of our positive rules. The daily assembly of our College community for family instruction and devotion has been found promotive of the *esprit du corps* and sympathy essential to harmony and good order; therefore all students are required to be present with the professors in Chapel at daily family worship, which consists in the reading of the Scripture, singing and prayer.

Students are prohibited, on penalty of dismissal, from having or using intoxicating liquors, or deadly weapons, and from organizing, or having active membership in, secret fraternities.

Religious Services.

Rev. J. W. W. Shuler, Pastor (1898-'99).

Public worship is held in the Chapel twice on each Sabbath. At the morning services the pulpit is filled successively by the pastor, President Waterhouse, Dr. W. H. Price and Rev. W. M. Dyer, President of Martha Washington College. Attendance upon the morning service is required of all students, except such as have special permission to attend church elsewhere.

The evening services are conducted by the ministerial students. In these the young preachers find at once an excellent opportunity for gaining experience and doing good to their fellow students. These occasions are enjoyable and edifying, and although the attendance upon them is wholly voluntary, it is always good.

The Sabbath-School.

On Sunday morning, at 9:30 o'clock, the Sabbath-school meets, under the superintendency of Prof. J. T. Littleton. This study is according to the schedule of the International Lesson Texts. The professors, assisted by some of the ladies of the community, do the teaching. The influence of the admirable work done here is visible in an enlarged knowledge of the word of God, and in the moral tone which prevades the life of the pupils. While attendance is voluntary, it is strongly urged. Parents may be of great assistance in this work, as the monthly reports show whether or not their sons attend.

Voluntary daily and weekly prayer meetings are found to contribute not a little to the cultivation of religious life among our young men.

Young Men's Christian Association.

W. C. CARRIGER, PRES'T.

H. D. KARNES, SEC'Y.

It is the aim of this organization to bring young men to Christ and to develop Christian manhood. Its methods are such as have been approved by the most experienced workers. Members of the State and International Committees make visits for the purpose of giving advice and encouragement, and delegates from the Association attend State Conventions, College and District Conferences, for the purpose of being spiritually strengthened and learning improved methods.

Voluntary services are held daily, except Saturdays, in the Association Hall. These meetings consist of song, prayer, Bible readings, short talks, varying at the option of the leader. Wednesday nights have been set apart for public prayer meetings, which the people of the community are expected and invited to attend.

The young men conduct the meetings, and nearly all the members take part. Voluntary Bible classes also meet weekly under the leadership of the older members.

Missionary meetings are held monthly, in which some mission field is the topic, and its most important features are discussed by previously appointed speakers, who have access to an excellent missionary library.

Lectures are delivered before the Association by prominent Christian speakers. This year these lectures were delivered by Dr. D. S. Hearon, Rev. Guinn, Dr. Y. J. Allen, Rev. Mr. Mathews, Professor Repass, Rev. W. E. Townsen, Rev. P. L. Cobb and Mr. Cantler.

Special revival services were conducted during the Fall term by Rev. J. W. W. Shuler, assisted by T. C. Shuler, of Wytheville, Va., and during the Spring term by Rev. F. Y. Jackson, of Knoxville, Tenn., resulting in great good to the association.

Reading Room.

The Association conducts and supervises the students' Reading Room. A large, well-lighted room has been set apart for this purpose, and is liberally supplied with the best periodical literature.

It is open to all members of the college on the payment of a fee of \$1.00, partially to defray its expenses.

All students are strongly urged to avail themselves of its manifest advantages.

The work of the various officers and committees, as well as religious work in the community and personal work among the students, affords invaluable training for young Christians.

New students will have a warm reception in our beautiful audience-room at the William Morrow Science Hall. Sectarianism is not known in the Y. M. C. A. movement. The president and secretary invite the correspondence of any who contemplate entering College.

Location.

Our location is in the country. One has said, "God made the country, man made the town." What hinderances to the right education of the young have parents and teachers found in the little village and average town with their gossip, examples of idleness and stealthy allurements to vice? What is a city by day but a great workshop filled with the buzz and

whirr of spindles, the clatter of hoofs and wheels, bang of looms, roar of engines, smoke of furnaces, dust and din of trade; and by night, but the same, with business measurably suspended, and itself illuminated and decorated as a house of pleasure wherein entertainments are given, a few that elevate and refine, a multitude that utterly debase and destroy.

Reason may justify the location of a University whose students are mature men, near or within the corporate limits of a city, but to thus locate a college proper is more than a blunder. The country, with its outstretching earth, its overarching heaven, is God's temple built to soothe and incite the mind, to inspire study.

Our location is in "Old Virginia," in her "great Southwest," in a mountain valley, twenty-one hundred feet above the sea, amid beauty that charms and refines like poetry or music, and in an atmosphere that enriches blood, builds up bone, nerve, muscle, body and brain.

Freedom from Temptations.—The College owns the land for nearly a mile around it, and no one, not even a servant, may come upon the grounds unless adjudged to be a suitable person by the Faculty.

The sale of intoxicating liquors is now prohibited by law in the counties of Southwest Virginia.

Accessibility.—The Norfolk & Western Railroad, a part of the great trunk line from the South to the North and East, passes through the College farm, and has a depot on the grounds. Persons coming from the South and Southwest should buy through tickets to Emory, Va.

Emory, Va., is the name of the postoffice, railroad and express station. It is a money-order office.

Our telegraph office is Glade Spring, three miles distant, with which we are connected by telephone.

Buildings and Grounds.

The main College building, which is a commodious brick edifice of the classic mould of its day, one hundred and fifty by forty-five feet, four stories high, is situated upon a commanding eminence in the Campus. It contains the Treasurer's office, six large lecture-rooms, and forty rooms for students. In the center of this building, on the second floor, is the Chapel, which seats comfortably three hundred persons. It is adorned with two brass memorial tablets, one in memory of the first President, Rev. Charles Collins, D. D., the other in memory of those chivalrous spirits who went from our midst and fell on the field of battle; and especially our illustrious sons, Gen. J. E. B. Stuart and Gen. Wm. E. Jones. The walls are hung with large portraits of the patron saints, Bishop John Emory and Patrick Henry, and with those of all the presidents of the institution, from its foundation to the present, except one.

The Byars House is the College boarding-house and hotel. The building is of modern style, beautiful and convenient. It is kept by Mr. J. W. Maiden.

The halls of the Calliopean and Hermesian Literary Societies occupy the whole of the third floor of this building. These halls are finely finished and superbly furnished. They are beautified by the contributions of cultured taste and a liberal expenditure of means, so that they are unsurpassed, possibly unequalled, by any halls of similar use in the nation. Here these celebrated societies, under the guidance of a progressive leadership, and impelled by the stirring

and ennobling memories of a half century, meet once every week for forensic discussions, and to use other means for literary cultivation and manly development.

The Sam. W. Small Gymnasium is a large, octagonal building, named for the noted evangelist whose public spirit and liberality were the largest contributors. The building is constructed with reference to a double use, viz.: during the session, for bodily exercises, and at the close, as a public auditorium. Its seating capacity is about sixteen hundred.

The Wm. Morrow Science Hall is named in honor of that philanthropic, generous Christian gentleman, Dr. William Morrow. It contains a Chemical Lecture room, Chemical Laboratory, Physical Lecture room, Cabinet of Minerals and Fossils, Apparatus rooms, rooms for Chemical Calculus; also lecture tables, students' working-tables of the most approved modern pattern, gas chambers with ventilating flues, etc. The building is supplied with gas for heat and light. It furnishes excellent advantages for instruction; both theoretical and practical, in Chemistry, with opportunities for analysis, for determination of minerals, for assaying, for physical experiments, etc. It is built of brick, covered with metal shingles, and presents a handsome appearance in modern style.

The Campus contains twenty-two acres set in blue grass. At the east end is the famous spring, not to be forgotten by any one who has seen it, furnishing an abundant supply of the purest water.

Just without and encircling the Campus are the houses and grounds of the professors.

The College is near the center of the College farm, which contains over five hundred acres.

Library.

The College Library numbers now about ten thousand volumes, among which are many rare and valuable books. Recently the library rooms were enlarged in furnishing and number, the books carefully re-arranged and our catalogue revised, so that the volumes are much more readily and easily utilized.

Contributions should be sent to the Librarian, by whom all such donations will be promptly acknowledged. Duplicate copies of good books, new or well preserved, are always useful and acceptable.

This being a Government depository, the Library receives all the issues of the United States Government Press.

Readings, Concerts and Lectures.

During the session there will be given in the Chapel a number of concerts, readings and lectures by the best talent that can be commanded. Such exercises have proved a source of great amusement and instruction to the students. It is our aim to carry on and improve this work in the future.

Literary Societies.

The Calliopean and Hermesian Societies have a history coeval with that of the College. In their management and character they challenge comparison with those of any other institution in the land. Many of the young men now directing them are the sons of men who in other years were active members. We deem it a matter of very great importance to foster them and to protect them from all influences that would impair their usefulness or endanger their permanency. Hence our objections to secret fraternities of all sorts. As now conducted, the Societies furnish the finest oppor-

tunities for practice and improvement in forensic discussions, elocution and English composition. Their halls are very commodious and well furnished. During the session a Public Debate is held by each Society. For dates of Public Debates see Calendar.

English Scholarships.

Through the liberality of Leon Jourolmon, Esq., of Knoxville, Tenn., two scholarships have been established to stimulate the study of the English language, and to promote productive work in English.

These scholarships are worth one hundred dollars each to the successful contestants, and are awarded to no one who has not completed the prescribed course in English through the Sophomore year, and made a grade of ninety per cent. on the work required, and passed on at least two other regular studies.

Shoemaker Scholarships.

Col. J. L. Shoemaker, who died in Gate City, Va., January, 1894, and whose will was probated in Scott County Court the 14th day of February, 1894, left to Emory and Henry College some eight or ten thousand dollars of his estate for the purpose of establishing free scholarships for poor and deserving young white men. His will appoints trustees of the fund and allows them to pay out of the annually accruing interest the tuition of each beneficiary, and also appropriates a sum to buy necessary books and stationery. The trustees are Hon. J. B. Richmond and R. C. Strong, Esq., of Gate City, Va., and Patrick Hagan, Esq., of Dungannon, Va.

Under the laws of the State only Virginians can receive the benefit of the fund, and all applications should be made to above trustees.

Col. Shoemaker showed great wisdom in establishing this form of endowment. If the fund is carefully preserved and administered, hundreds may rise up to bless his name and memory. The College earnestly hopes that other friends of Christian education may follow his example, thus enabling the institution to reach and educate a class of young men most deserving and whose education promises much to both church and state.

Prize Medals.

1. For the encouragement of proficiency in Oratory there has been established, through the liberality of Wyndham Robertson, Esq., a sufficient and permanent fund, of which the income, in the form of a gold medal, with expressive sentiments and emblems, is bestowed at each Annual Commencement upon the students in the Junior or Senior Class who excel in composition and oratory.

2. The Collins Prize for excellence in English Composition, founded by the late Rev. Charles Collins, D. D., first President of the College, is to be awarded in the form of a gold medal.

3. To increase interest and promote scholarship in the Natural Sciences, a gold medal is annually awarded to the student who attains the highest grade in this department. The medal is furnished from a permanent fund established by the late Col. William Byars.

Candidates for the prizes in Natural Science must attain to a required standard of proficiency in Botany, Natural Philosophy, Geology, Mineralogy and Chemistry.

4. During the session '88-'89 Col. Frank E. Wil-

liams, a graduate of the College, donated a permanent fund, the income from which is to furnish a handsome medal for Declamation, to be awarded to the best declaimer in the Freshman and Sophomore classes.

The Society of the Alumni.

This Association, composed of all the graduates of the College and of such other former students as may be elected members at the annual meetings, now number nearly six hundred, and is an important and interesting feature in the history and work of the College. It has its representatives in all parts of our Southern and Western country, also in Mexico, South America, Japan and China. Its annual meetings, held in June of each year, have been occasions of great interest. From their number one is selected to address the Society annually. The fires of youthful enthusiasm are rekindled from a common altar as they meet to renew the memories of the past, and pledge to each other afresh the friendship begun in earlier days. In addition to these pleasing features, the object of the Society is to advance the interest of the College and promote letters and progress.

Honors.

The following students, having attained the highest average grades, were appointed monitors for the session of 1898-'99:

Fall Term.

- | | |
|----------------------|-----------------------|
| 1. H. M. CARRIGER. | 3. W. S. DANGERFIELD. |
| 2. A. P. CUNNYNGHAM. | 4. F. W. DEFRICE. |

Spring Term.

- | | |
|--------------------|-----------------------|
| 1. H. S. BOOTH. | 3. J. C. PATTERSON. |
| 2. H. M. CARRIGER. | 4. W. S. DANGERFIELD. |

Honors Conferred June, 1898.*First Honor in Senior Class:*

J. F. JOHNSTON, Ga.

Second Honor in Senior Class:

WYTHE M. HULL, Va.

Wyndham Robertson Prize in Oratory:

WYTHE M. HULL, Va.

Collins Prize for English Composition:

W. C. CARRIGER, Va.

Frank E. Williams Prize for Declamation:

W. A. TILSON, Va.

Leon Jourolmon English Scholarships:

A. P. CUNNYNGHAM, Tenn.

J. L. DAVIS, Va.

Calliopean Medalist, June, 1898:

DEBATER—J. L. DAVIS, Va.

IMPROVEMENT IN DEBATE—H. M. CARRIGER.

Hermesian Medalist, June, 1898:

IMPROVEMENT IN DEBATE—O. E. COBB, Texas.

The Degree of Bachelor of Arts was conferred on:

J. H. GROSECLOSE, Va. WYTHE M. HULL, Va.

J. FOOTE JOHNSON, Ga. G. H. KENDRICK, Va.

JAMES L. MULLINS, Tenn.

ALUMNI OF THE COLLEGE.

We earnestly request any information that will enable us to make this list more accurate, and shall be grateful for any interesting facts concerning the life and labors of Emory and Henry's sons.

Endowments.

The College has a few thousand dollars of productive endowment which is slowly increasing, and like all institutions of its grade, stands in need of much more than it has or is getting.

Form of Legacy.

I give and bequeath to the Trustees of Emory and Henry College, at Emory, Virginia, the sum of.....
dollars, for the benefit of said institution.

* Deceased.
